Forecast for Saturday 05 Oct 2024

Weather: Dry and bright today with some long sunny periods, although this will be rather hazy at times due to high cloud this afternoon. Cloud begins to increase again through the late afternoon with a chance of scattered, mainly light, showers arriving this evening.

Chance of cloud-free hill tops above 600m: 100%

Low cloud and visibility: Little or no cloud below the summits. Visibility very good with panoramic views of surrounding hills, falling to several kilometres in evening showers.

Forecast for Sunday 06 Oct 2024

Weather: A mostly cloudy day with outbreaks of rain. The rain is expected to become more persistent and occasionally heavy for a time from early to mid-afternoon before clearing to broken cloud and scattered showers through the late afternoon and evening.

Maximum wind: Southerly or southeasterly 25-30mph, with gusts around 50mph over ridges and summits, decreasing 10-15mph through the afternoon.

Chance of cloud-free hill tops 600m: 100% at first decreasing overnight to 40% and then close to zero with the rain, before improving, from the west, to 80% through late afternoon and evening.

Low cloud and visibility: Periods or persistent cloud developing above about 450-600m, lowering to 300-450m at times in rain, becoming occasional around 600m through the late afternoon and evening. Away from cloud visibility good falling to several kilometres in rain, becoming mainly very good through the late afternoon and evening.

Temperature: **Valleys:** Plus 10 or 11 Celsius at dawn rising to plus 15 or 16 Celsius by early afternoon
At 600m: Around plus 8 increasing 11 Celsius
Freezing level: Above the summits
